SUMMARY

- Experience in testing, troubleshooting, and resolving high complexity system issues
- Knowledge of MS SQL server, SDLC, agile methodology, and data structures
- Experience in analyzing and visualizing data; creating interactive reports and charts
- Strong communication and problem solving skills developed through handling multiple clients
- Collaborative, quickly learn and master new technologies, and great analytical thinker

TECHNICAL SKILLS

- **Development-** React, Angular, jQuery, NodeJS Express, CSS, Bootstrap, HTML, Rest API, Typescript, Unit test, Jasmin, Webpack, AJAX
- **Programming-** JavaScript, Python, Java, C#, ASP.NET, PHP
- **Cloud-** Azure, AWS.
- **Methodology-** Agile, Scrum
- **Databases-** MySQL, SQL, MongoDB
- **Tools & Platforms-** Shopify, WordPress, Tableau, Power BI, JIRA, Salesforce, HubSpot CRM, ServiceNow, Hadoop, Adobe, Google Ads, Git, Eclipse
- **Office-** MS Word, MS Excel (Pivot Table), MS PowerPoint, MS Access

WORK EXPERIENCE

Web Developer   *March 2021 – Present*
Digital Main Street

- Developed specific parts of the application such as user login, registration, and dashboard page.
- Created test cases and thoroughly tested all the test scenarios for the given development using SQL Server Management Studio (SSMS).
- Ensured and performed daily health checks of the applications, scripts, and infrastructure.
- Assisted QA teams and performs a variety of tasks related to production support including bug identification, program fixes, and program documentation
- Work with UX/UI designer to execute on the design plan

Ecommerce Coordinator   *September 2020 – March 2021*
Mosaic

- Closely worked with business owners to gather and analyze the requirements and based on that suggested suitable platforms.
- Collaborated with Shopify and Facebook teams to resolve complex system issues and bugs.
- By acting as the first point of contact, handled and troubleshot platform-related client requests.
- Modified the code in Shopify Liquid using HTML/ CSS, JavaScript, jQuery to maximize user experience
- Managed and integrated multiple projects on HubSpot CRM through CI/CD
- Designed website layouts and architecture to maximize user experience and SEO

Software Engineer   *January 2019 – June 2019*
  Cygnux SoftTech
- End to end solution development using Microsoft BI Stack (SSAS, SSIS, SQL)
- Adept at frontend technologies (Power BI, jQuery, HTML, CSS, AngularJS)
- Created revenue recognition engine for incentive compensation using Python, SQL, SSIS, Power BI
- Created real-time business reviews and automated metrics to enable Rhythm of Business discussions using ASP.NET C#, Azure Stack, REST API, SQL, SSIS
- Analyzed user data and created visual data reports for the cross-functional teams.

PROJECT WORK

Job Trend Analysis   *May 2020 - August 2020*
  University of Windsor
- Collected jobs data from multiple job portals using python and stored in MongoDB
- Analyzed and processed the data to parse useful information from description such as job skills
- Created meaningful visualizations from the data using Python
- Analyzed job market and trending software engineering skills

Internship Progress Tracker   *January 2020 – April 2020*
  University of Windsor
- Developed web application using Python, Flask, MongoDB and React
- Built APIs that allowed users to track their progress after updating the skills
- Developed login screen and register component
- Predicted the probability of internship by comparing to the data stored in database

EDUCATION

Master of Applied Computing   *September 2019 – December 2020*
  University of Windsor
  (Coursework: Advanced Software Engineering, Advanced Database Topics, Advanced Computing Concept)
